

## Bidding for government contracts is now better than ever!

### Introducing the **new & improved** eProcurement Portal

The new and improved e-Procurement and Supplies Registry System (ePSR) is an online tender management system where all national procurement opportunities are facilitated.

This modern e-procurement portal provides increased opportunities for small and medium Bahamian businesses to participate in national procurement.

The system also supports competition, reduces government expenditure and provides greater value for money for the Bahamian people.

All business owners are encouraged to register on the portal for instant access to all relevant bidding opportunities.
